Fiberglass Pergolas

The strongest pergola kit on the market does not absorb moisture allowing paint to adhere much longer. Incredible strength sets this pergola apart. Without metal or wood inserts, you can have a freestanding pergola with an overall size of 18' x 18' with just four columns!

Affordable. Elegance. Lasting Beauty.
The world's first complete fiberglass pergola system

Available Color Options

Why Fiberglass?

- Very low-maintenance required
- Multiple color options for matching color schemes
- Corrosion resistant – unaffected by the elements or temperature
- Consistency in appearance and design
- Span longer distances than wood, vinyl, and composites (up to 18 ft.)
- Longer spans create more usable open space underneath pergola
- Engineered with ease of installation
- No interior post, beam or other reinforcement are necessary
- Light weight materials but pound for pound, stronger than steel products
- Will not warp, twist, shrink, or sag in extreme temperature conditions
