

Canyon Winds Wood Fencing

Components Per 8' Section

1- 6x6 10' Cedar-Beveled Post

2-1x6 8' Cedar-Top/Bottom Fascia Rails

3-2x6 8' Cedar-Top/Bottom Rails & Cap

21-1x6 6' Cedar-Overlapping Slats

Cedar is naturally resistant to insects and decay, due to its distinct cell structure and natural organic compounds called thujaplicins. This aromatic lumber is the best natural choice for outdoor building. Cedar is also dimensionally stable wood that is far less likely to turn, twist, bend and bow like chemically coated pressure treated lumber. Natural preservatives in cedar also significantly outlast treated lumber. Properly finished and maintained cedar will endure longer than if left in its natural state.

Cedar Rail Wood Fencing

Post Spacing 8' O.C.

Components Per 8' Section

- All cedar lumber
- Post: approximately 6"x6" typical
- (2+) Rails: 2x6 typical (other common options: 2x4 or 2x8)

The Cedar Rail fence style is an open space fence. This fence is popular where a perimeter needs to be defined but privacy is not required. A Cedar Rail fence is a more polished ranch style fence with flexible options such as adding more rails for additional height, or changing the design of the post top. Anticipated longevity for this type of fence is around ten years.
