

ESTATE PRIVACY FENCE

How To Estimate Materials:

1. Diagram your fence including all gate locations. For each continuous run, mark starting points and stopping points (see example to the right).
2. Write the measurements for each line in feet. Determine the section count by dividing each line on your diagram by 8 (always round up). Post spacing for Estate Privacy is 8 ft. on-center maximum. Write the section count next to each line.
3. Total the # of sections (this will give you the # of privacy kits to order).
4. Total the # of stopping points.
5. Total the # of sections + # of stopping points (this will give the # of total posts & post caps to order).
6. Determine the type of posts (corner, end, line) needed:

-  A corner post (C) is connected to two sections at an angle.
 -  An end post (E) is connected to only one section.
 -  A line post (L) is connected to two sections in same direction.
- tip: # of line posts equals # of total posts minus # of corner posts minus # of end posts*
