IRON FENCE ESTIMATOR

How To Estimate Materials:

1. Diagram your fence including all gate locations. For each continuous run, mark starting points and stopping points (see example to the right).

2. Write the measurements for each line in feet. Determine the section count by dividing each line on your diagram by 8 (always round up). Post spacing for ornamental iron fences is 8 ft. on-center maximum. Write the section count next to each line.

3. Total the # of sections (this will give you the **# of privacy sections to order in the style you choose**).

4. Total the # of stopping points.

5. Total the # of sections + # of stopping points (this will give the **# of posts to order**).

Example diagram: Ornamental Iron fence with 8 ft. (max) post

96' (12 sect)

* 43' (6 sect)

60' (8 sect)

◆ = Starting Point

□ = Stopping Point

single gate

double gate

HOME

8' (1 sect)   5' (1 sect)   6' (1 sect)   5' (1 sect)

Sections: **30** + Stopping points: **3** = Total Posts: **33**

*Example 43 ft. length: 43 ft. ÷ 8 ft. post spacing = 5.37 sections, round up to 6 sections
