

SIMTEK FENCE (3ft or 6ft) MATERIALS ESTIMATOR

How To Estimate Materials:

1. Diagram your fence including all gate locations. For each continuous run, mark starting points and stopping points (see example to the right).
2. Write the measurements for each line in feet. Determine the section count by dividing each line on your diagram by 6 (always round up). Post spacing for a 3' or 6' tall Simtek Fence is 6 ft. on-center maximum. Write the section count next to each line.
3. Total the # of sections (this will give you the # of privacy kits to order).
4. Total the # of stopping points.
5. Total the # of sections + # of stopping points (this will give the # of total posts to order).
6. Determine the type of posts (corner, end, line) needed:

- A corner post (C) is connected to two sections at an angle.
- An end post (E) is connected to only one section.
- A line post (L) is connected to two sections in same direction.

tip: # of line posts equals # of total posts minus # of corner posts minus # of end posts

CALCULATE MATERIALS HERE

of Sections: _____
 +
 # of Stopping Points: _____
 =
 Total # of Posts: _____
 -
 # of Corner Posts: _____
 -
 # of End Posts: _____
 =
 # of Line Posts: _____

■ Replace one End Post with a Gate Post for each Gate Panel Purchased

DIAGRAM LAYOUT HERE: (If necessary, refer to instructions above)

Fence Materials

<input type="checkbox"/> 3' TALL <input type="checkbox"/> 6' TALL	Quantity		Price		Item Subtotal
# OF 6' WIDE PANELS		X		(=)	\$
# OF CORNER POSTS		X		(=)	\$
# OF END POSTS		X		(=)	\$
# OF LINE POSTS		X		(=)	\$
# OF GATE POSTS		X		(=)	\$
# OF 4' WIDE GATE PANELS		X		(=)	\$
# OF 6' WIDE GATE PANELS		X		(=)	\$
