

# VINYL FENCE MATERIALS ESTIMATOR

## How To Estimate Materials:

1. Diagram your fence including all gate locations. For each continuous run, mark starting points and stopping points (see example to the right).
2. Write the measurements for each line in feet. Determine the section count by dividing each line on your diagram by 7 (always round up). Post spacing for a Vinyl Fence is 7 ft. on-center maximum. Write the section count next to each line.
3. Total the # of sections.
4. Total the # of stopping points.
5. Total the # of sections + # of stopping points (this will give the # of total posts to order).
6. Determine the type of posts (corner, end, line) needed:

- A corner post (C) is connected to two sections at an angle.
- An end post (E) is connected to only one section.
- A line post (L) is connected to two sections in same direction.

*tip: # of line posts equals # of total posts minus # of corner posts minus # of end posts*

### CALCULATE MATERIALS HERE

# of Sections: \_\_\_\_\_  
 +  
 # of Stopping Points: \_\_\_\_\_  
 =  
 Total # of Posts: \_\_\_\_\_  
 -  
 # of Corner Posts: \_\_\_\_\_  
 -  
 # of End Posts: \_\_\_\_\_  
 =  
 # of Line Posts: \_\_\_\_\_

■ You will need one Gate Post Stiffener for each Gate Panel Purchased

### DIAGRAM LAYOUT HERE: (If necessary, refer to instructions above)

### Fence Materials

	Quantity		Price		Item Subtotal
# OF FENCE SECTIONS		X		(=)	\$
# OF CORNER POSTS		X		(=)	\$
# OF END POSTS		X		(=)	\$
# OF LINE POSTS		X		(=)	\$
# OF GATE POST STIFFENERS		X		(=)	\$
# OF 4' WIDE GATE PANELS		X		(=)	\$
# OF 6' WIDE GATE PANELS		X		(=)	\$
Note: Does not include tax or concrete.				Total	\$
